Backend Technologies: Laravel.
Operating Systems: Linux, Windows
Databases: MySQL, SQLite, MongoDB

CERTIFICATIONS

- The Complete Web Development Bootcamp (Colt Steele)
- Advanced CSS and Sass (Jonas Schmedtmann)

Key Achievements

- ❖ *Significantly improved efficiency through troubleshooting problems;* identified just technical needs and updates related to files and libraries considered by team during product update for new addon features as well as fixing bugs completely ignoring issues raised during client requests; faced tough challenge to proactively reach out to clients and clearly understand end users' problems; put emphasis on client request issues, regularly used online survey forms for identifying periodic/timely status of product issues through end user, clearly identified end user's problems, connected with client through regular feedback forms; **improved efficiency by 14%**

- ❖ *Demonstrated experience in handling additional responsibilities;* company assigned extra task to work on development process and client handling after senior developer left job in unusual circumstances; faced tough challenge to closely work with team with limited knowledge and resources; carefully studied all product development phases including query processing, used Oracle and got familiar with data connectivity, and data manipulation techniques, clearly understood team goals, completed online tutorials; **improved company's image by completing project on time, generated $5K new business from existing client**

- ❖ *Proven ability to "go above and beyond" for client satisfaction even while multitasking;* accepted responsibility to manage different tasks while working on multiple projects simultaneously; faced tough challenge to manage tasks such as testing, updating, maintenance, development, and assisting product support simultaneously; took complete responsibility of most important and urgent tasks, delegated process related to product support and ticket raising to new trainee, made trainee understand each development for clarity in handling and assigning tickets to appropriate team, assigned dedicated account manager to client; **increased client satisfaction rating from 8 to 9.5**

- ❖ *Created outstanding results through strong communication skills;* dealt with non-technical client based in another state; challenged with understanding client's requirements, clearly converting them into technical concepts, and offer sound business solution; conducted meetings with client and clearly understood requirements in lame man's terms, articulated requirements in technical terms to team, designed story boards and mock-ups to understand product needs, kept client informed with each development phase; **successfully completed project within timeframe, strengthened client relationship for future business opportunities**
